PROBLEMS OF CONTROL AND INFORMATION THEORY, VOL. 16 (1987)

AUTHOR INDEX

Apoyan, G. T. **16,** *2,* pp. 135–142
Avetissian, S. S. **16,** *1,* pp. 41–47
Balakirsky, V. B. **16,** *1,* pp. 29–40
Barg, A. M. **16,** *5,* pp. 329–340
Blatník, J. **16,** *4,* pp. 271–282
Bocharov, P. P. **16,** *3,* pp. 211–222
Chernousko, F. L. **16,** *2,* pp. 125–134
Csibi, S. **16,** *4,* pp. 259–269
Csiszár, I. **16,** *1,* pp. 3–27
Emelyanov, S. V. **16,** *3,* pp. 155–168
Fekete, I. **16,** *4,* pp. 303–313
Fidler, J. **16,** *3,* pp. 223–231
Föglein, J. **16,** *5,* pp. 385–394
Gabor, G. **16,** *4,* pp. 303–313
Györfi, Z. **16,** *4,* pp. 303–313
Gyurkovics, E. **16,** *1,* pp. 61–72
Jarušek, J. **16,** *2,* pp. 89–99
Ježek, J. **16,** *5,* pp. 373–384
Khachatrian, G. Kh. **16,** *3,* pp. 187–192
Kleimenov, A. F. **16,** *2,* pp. 73–87
Konev, V. V. **16,** *2,* pp. 101–112
Korovin, S. K. **16,** *3,* pp. 155–168; **16,** *4,* pp. 243–252
Kramosil, I. **16,** *6,* pp. 399–409
Kutoyants, Yu. A. **16,** *1,* pp. 41–47; **16,** *2,* pp. 135–142
Mamedov, I. G. **16,** *3,* pp. 155–168; **16,** *4,* pp. 243–257
Mahmudov, E. N. **16,** *6,* pp. 411–427
Martirossian, S. S. **16,** *3,* pp. 187–192
Myszka, W. **16,** *3,* pp. 193–209
Novovičová, J. **16,** *1,* pp. 49–59
Ovseevich, A. I. **16,** *2,* pp. 125–134
Papir, Z. **16,** *6,* 459–469
Pósafalvi, A. **16,** *3,* pp. 169–186
Rafajłowicz, E. **16,** *3,* pp. 193–209
Roubiček, T. **16,** *4,* pp. 283–301
Šebek, M. **16,** *5,* pp. 373–384
Shaikhet, L. E. **16,** *6,* pp. 439–448
Shamrikov, B. M. **16,** *5,* pp. 341–353
Silayev, A. I. **16,** *5,* pp. 355–372; **16,** *6,* pp. 423–437
Šindelář, J. **16,** *6,* pp. 399–409
Sladký, K. **16,** *4,* pp. 271–282
Sztrik, J. **16** *2,* pp. 143–153; **16,** *3,* pp. 169–186
Teo, K. L. **16,** *4,* pp. 315–328
Tong van Sach **16,** *2,* pp. 113–123
Tuzar, A. **16,** *3,* pp. 223–231
Vasiliev, V. A. **16,** *2,* pp. 101–112
Volf, P. **16,** *3,* pp. 233–241
Vvedenskaya, N. D. **16,** *5,* pp. 329–340
Zyablov, V. V. **16,** *5,* pp. 329–340

PROBLEMS OF CONTROL AND INFORMATION THEORY, VOL. **16** (1987)

SUBJECT INDEX

Apoyan, G. T., Kutoyants, Yu. A.: On compensator estimation of inhomogeneous Poisson process. **16,** *2,* pp. 135–142

Avetissian, S. S., Kutoyants, Yu. A.: On a model of prophylaxis **16,** *1,* pp. 41–47

Balakirsky, V. B.: The decoding error probability of the linear codes in the multiple access channels. **16,** *1,* pp. 29–40

Barg, A. M., Vvedenskaya, N. D., Zyablov, V. V.: On error and erasure probabilities for block codes with incomplete decoding in a fading channel. **16,** *5,* pp. 329–340

Bocharov, P. P.: Analysis of the queue length and the output flow in a single server with finite waiting room and phase type distributions. **16,** *3,* pp. 211–222

Csibi, S.: More on the stability of a data packet flow embedded randomly into a partially active, scheduled speech flow, **16,** *4,* pp. 259–269

Csiszár, I.: Information theory and ergodic theory. **16,** *1,* pp. 3–27

Emelyanov, S. V., Korovin, S. K., Mamedov, I. G.: Structural transformations and spatial decomposition of control systems: the quasi-decoupling method. **16,** *3,* pp. 155–168

Fekete, I., Gabor, G., Győrfy, Z.: The application of recursive (switched) quantizers in the compression of tomographic pictures. **16,** *4,* pp. 303–313

Fidler, J., Tuzar, A.: Numerical method for minimum energy problem of train control. **16,** *3,* pp. 223–231

Föglein, J.: On the rate of a dynamic stochastic approximation method. **16,** *5,* pp. 385–394

Gyurkovics, E.: Hölder condition for the minimum time function. **16,** *1,* pp. 61–72

Jarušek, J.: Remark to the generalized gradient method for the optimal large-scale heating problem. **16,** *2,* pp. 89–99

Khachatrian, G. Kh., Martirossian, S. S.: Codes for T-user noiseless adder channel. **16,** *3,* pp. 187–192

Kleimenov, A. F.: Modified Stackelberg strategies for hierarchical differential two-person games. **16,** *2,* pp. 73–87

Kramosil, I., Šindelář, J.: A note on the law of iterated logarithm from the viewpoint of Kolmogorov program complexity. **16,** *6,* pp. 399–409

Mahmudov, E. N.: Duality in the problems of optimal control for systems described by convex differential inclusions with delay. **16,** *6,* pp. 411–427

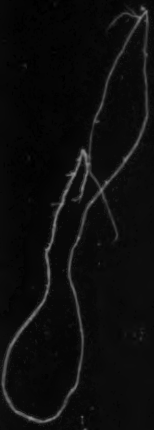
Novovičová, J.: Recursive computation of M-estimates for the parameters of the linear dynamical system. **16,** *1,* pp. 49–59

Ovseevich, A. I., Chernousko, F. L.: On optimal ellipsoids approximating reachable sets. **16,** *2,* pp. 125–134

Papir, Z.: Queueing analysis of blockage time distribution for end-to-end controlled virtual circuit in packet-switched communication network. **16,** *6,* pp. 459–469

Pósafalvi, A., Sztrik, J.: On the $\langle (m, n)(\tilde{M}/\tilde{M})1 \rangle$ priority queues and their applications. **16,** *3,* pp. 169–186

Rafajłowicz, E., Myszka, W.: L-optimum input signals for distributed systems identification. **16,** *3,* pp. 193–209

Roubíček, T.: A model and optimal control of multidimensional thermoelastic processes within a heating of large bodies. **16,** *4,* pp. 283–301


Šebek, M., Ježek, J.: Control systems described by triangular transfer matrices. **16,** *5*, pp. 373–384
Shaikhet, L. E.: On an optimal control problem of partly observable stochastic Volterra's process. **16,** *6*, pp. 439–448
Shamrikov, B. M.: A qualitative analysis on dynamic plants' parametric identification accuracy using measurement samples of minimal volume. **16,** *5*, pp. 341–353
Silayev, A. I.: The use of the combined estimation based on quadratic decision-making functionals in the task of sensor movement determination using irregular informational field measurements. **16,** *5*, pp. 355–372
Silayev, A. I.: A filter with regular covariations and the minmax principle in the problem of movement determination using measurements of pseudorandom informational fields. **16,** *6*, pp. 423–437
Sladký, K., Blatník, J.: A note on the stability of interconnected dynamic systems with time-varying interactions. **16,** *4*, pp. 271–282
Sztrik, J.: Reliability of heterogeneous stand-by systems in Markovian environment. **16,** *2*, pp. 143–153
Teo, K. L.: Convergence analysis for a computational method for optimal control. **16,** *4*, pp. 315–328
Tong van Sach: On the capacity of discrete memoryless channels for linear codes. **16,** *2*, pp. 113–123
Vasiliev, V. A., Konev, V. V.: On sequential identification of linear dynamic systems in continuous time by noisy observations. **16,** *2*, pp. 113–123
Volf, P.: Estimation of the mean from random censored data. **16,** *3*, pp. 233–241
